- Enjoy reliable service from a company you can depend on

BellSouth FastAccess Business DSL turns a burst of speed into a boost in productivity.

If your business depends on access to the Internet, a reliable, high-speed Internet connection from BellSouth FastAccess Business DSL will increase productivity, boost efficiency and save money – all at the same time.

Digital Subscriber Line (DSL) technology maximizes the capacity of your existing phone line by delivering Internet access that's up to 50 times faster than dial-up connections.*

Your employees can search the Web, and talk or fax on the same line at the same time. Plus, with a router, connect multiple PCs to a single FastAccess DSL line at no additional monthly cost. Save by consolidating individual dial-up accounts to one FastAccess DSL line.

Different options for different needs.

There are about as many ways for businesses to use the Internet as there are businesses that use it. So we've expanded our DSL offering to create the ultimate work force with five versatile options to accommodate your specific needs.

Five ways to get the speed you need with BellSouth FastAccess Business DSL!

- 1. BellSouth® FastAccess® Business** is our high-speed Internet service which delivers blazing Internet speed over your existing line. It allows you to download large files up to 50 times faster than with a dial-up connection*.
- 2. BellSouth® FastAccess® Business Static IP** includes the speed of FastAccess Business, plus allows you to host servers for remote access to Websites and applications, as well as LANs and VPNs. With it, you can assign up to 61 permanent Static IP addresses to onsite devices.
- 3. BellSouth® FastAccess® Business Speed 384** gives you the consistent two-way bandwidth speed required for interactive audio/video applications like video conferencing, distance learning or video on demand.
- 4. BellSouth® FastAccess® Business Speed 768** delivers super-fast upstream speeds to push large files out on to the Internet. This plan is a good choice if you host data-intensive files for Web, FTP and e-mail applications.
- 5. BellSouth® FastAccess® Telecommute** is an easy and affordable way to increase the productivity of employees who do work from home. With it, they can handle more work in less time. Employees will have high-speed access to LAN, VPN and other application networks, plus the ability to share large e-mail files.
