

# Now that I've invested in a data network system, how can I be sure my needs are implemented?

Rest assured with BellSouth® Design Engineering Service.

## At a Glance

- Consultative services
- Establish objectives & criteria
- Translate concepts to definitions
- Create design solutions
- Cisco Systems & Nortel Networks certified

Our Design Engineering team transforms your data network services ideas and concepts into a product definition that can satisfy your most stringent and valued business requirements. We can build the map that will lead you to your business goals.

## Why Engage BellSouth Design Engineering?

Coupling our extensive equipment knowledge with the time we take to obtain a clear understanding of your objectives and needs, BellSouth Design Engineers (DE) can deliver the most effective and cost efficient data network service available. We define the hardware and software architecture, components, interfaces and data for a system that satisfies your well-specified operational requirements.

All DEs are trained and certified with Nortel Networks, Cisco Systems and other equipment vendors. We support data equipment vendors that have demonstrated repeated success in developing and implementing e-business solutions including Data Networks. Our Design

Engineers have access to the latest tools and resources to design and create the most technically advanced solutions tailored for your business.

## Design Engineering Roles and Responsibilities

- Determine your requirements.
- Determine the equipment that best fulfills your requirements.
- Communicate with other BellSouth entities to obtain circuit information and implementation schedules.
- Obtain pricing for installation, maintenance and relevant professional services.

Our Data Network Design Engineering team can assemble the best combination of human and technical resources to fulfill the required objectives and present a design solution that allows you to fulfill your business goals.
